REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

In regards to claims 1, 2, 4-13, and 16-18, the prior art of record does not teach a EEG acquisition unit comprising a parameter storage for storing a database of EEG parameter data comprising amplifier and display variables and an access module coupled to the parameter storage for limiting access by the AU operator to the parameter storage. The closest prior art reference is Kumar et al, US 6,416,471 B1. Kumar teaches the user interface 118 providing control over configurable parameters of the system and a database 110 for storing patient data, which includes settings used to obtain data from the base station unit 30 and auxiliary sensors (see col. 28, lines 45-60, and col. 29, lines 30-58). The remote monitoring station 50 maintains the patient database 110 and allows the operator to access such data for analysis and processing. However, the database 110 is not stored in the base station (acquisition unit) 30. Thus, Kumar teaches limiting access of remote operators of the database, and not the operators of an acquisition unit. Therefore, Kumar does not teach the subject matter as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. A Certificate of Correction filed February 15, 2005 was approved in U.S. Patent No. 6,510,340, deleting claims 15-22. Therefore, the rejection of claims 1-5, 7, 10, and
